

HAZARD MANAGEMENT – SAFE OPERATING PROCEDURE (SOP)

Only to be completed where required as a control measure under a Risk Assessment

A document setting out the requirements to carry out the work in a safe and healthy manner and in a logical sequence. It must be able to be easily read by those who need to know what has been planned. It is relevant to the following people: - the worker carrying out the work; and - the person who has management and control over the work.	A SOP, if identified as a control measure, is to: - identify the work; - specify/address the identified hazards relating to the work; - describe the measures to be implemented to control the risks; - take into account the circumstances at the workplace that may affect the way in which the work is carried out; - take into account emergency management arrangements where applicable; and - be communicated to all workers who carry out the work.
---	---

NAME OF THE TASK/ACTIVITY	USE OF HEATER STIRRERS	DATE: 18/11/24
LOCATION	BADGER UNDERGRADUATE TEACHING LABS – G10, 115 AND 212 (NORTH TERRACE CAMPUS)	
RISK ASSESSMENT (RA) NAME	Heater Stirrer (Additional referenced RA/SOPs: Sharps and Glass)	
Residual risk rating on the RA	☒ Low ☐ Medium ☐ High ☐ Very High	
Hazards identified on the RA	Electric shock, exposure to hazardous vapours, fire and explosion hazard, contact with hot surface, potential for glass cuts, exposure to chemicals	

PERSONAL PROTECTIVE EQUIPMENT (BE SPECIFIC AND SPECIFY PPE TO BE WORN DURING THE TASK)
(DELETE THE ROW IF NOT APPLICABLE)

	Eye protection: ☒ Safety glasses ☐ Eye shields ☐ Safety goggles ☐ Other:
	☒ Long hair must be contained or covered ☐ Other:
	Hand protection: ☐ Rubber ☐ Cut resistant ☐ Leather ☐ Vinyl ☐ Neoprene ☒ Nitrile ☐ Barrier creams ☐ Other:
	☒ Enclosed footwear: ☐ Footwear that is resistant to spills of hazardous substances ☐ Boots with steel caps ☐ Other:
	Protective clothing: ☒ Lab coat ☐ Gown ☐ Long sleeves ☐ Long pants ☐ High visibility ☐ Helmet ☐ Sun protection ☐ Other:

DESCRIBE, IN SEQUENCE, STEPS TO COMPLETE THE ACTIVITY SAFELY

Pre-operational checks:

- Ensure the instrument is free from visual defects and is in good working order.
- SDSs of the chemicals being used should be consulted before beginning the task.
- A task-specific risk assessment should be completed for the experiment being conducted using the heater stirrer.

Operational checks/steps to complete the activity from start to finish (including transport and waste disposal where relevant):

- Securely clamp glassware. Ensure the heat setting is appropriate for the chemical being heated.
- If a spill occurs on or around the heater stirrer, immediately turn off, tag out and clean as per the SDS.
- Handle hot glassware and equipment with heat-proof gloves.

On completion of work – steps to make safe (including clean up, any waste disposal & service/maintenance requirements)

- Turn off heater stirrer and allow to cool.
- Wipe clean before putting away.

Emergency and Spill Procedures, Transport or storage requirements (where relevant), First aid/Medical

- If a spill occurs on or around the heater stirrer, immediately turn off, tag out and clean as per the SDS.
- All spills must be reported to the lab supervisor.
- Broken glassware needs to be reported to a demonstrator, swept up and disposed in the glass bin. Refer to the Sharps and Glass RA/SOP.
